Project Details

- **Client Name**: D H Liyanage
- **Project Name**: Daily Routine Website
- **Prepared By**: UcodeX Software Solutions
- **Date**:20/01/2025

Project Objectives

Daily Routine Website is designed to provide free services to users, offering a comprehensive platform with features such as Calendar, Daily Messages, Winners, Downloads, Health Talk Videos, Events, and Shopping.

The website encourages users to register, create a personalized profile, and track their activities, including comments, responses, and achievements. With tri-lingual support, social media integration, and QR code functionality, Daily Routine Website ensures accessibility and convenience for a diverse audience. Advertising spaces and popups also create monetization opportunities, making the platform sustainable.

Objectives

1. Provide an interactive platform with essential features like Calendar, Daily Messages, Winners, Downloads, Health Talk Videos, Events, and Shopping.

2. Maintain a user profile to track interactions, achievements, and other activities.

3. Offer a tri-lingual interface for broader accessibility.

4. Integrate social media and QR code functionalities for enhanced connectivity.

5. Monetize the app through advertising spaces and popups.

Core Features

1. Calendar Section

- ✞ Code entering or selection functionality.

- ✞ Year and Month selection.

- ✞ Yearly, Monthly, Biweekly, and Daily themes.

- ✞ Editable calendar view.

- ✞ Daily messages and special day remarks visible in each day's cell.

2. Daily Message Section

- ✞ A snippet of the daily message displayed on the home screen.

- ✞ Full message available upon clicking "See More."

3. Winners Section

- ✞ Display a few recent winners on the home screen.

- ✞ "See More" functionality to access the complete list of winners.

4. Downloads Section

- ✞ Showcase a few downloadable items on the home screen.

- ✞ Categorized downloads page with the following items:

  - PDFs

  - Images

  - Posts

  - Stickers

  - Wishing Cards

  - Emojis

  - Videos

5. Health Talk Video Section

- Highlight the latest video on the home screen.

- "See More" functionality leading to a categorized video library with a centralized video player.

6. Events Section

- Display recent events on the home screen.

- "See More" functionality leading to a categorized events page.

7. Profile Management

- User registration and profile creation.

- Track user interactions such as comments, responses, and achievements.

8. Additional Features

- Tri-lingual support for wider accessibility.

- Social media integration for sharing and connecting.

- Advertising space and popups for monetization.

9. Shopping Item Page

- ❖ Categorized Items
- ❖ Product Details
- ❖ Search Functionality
- ❖ Shopping Cart Integration
- ❖ Checkout and Payment Gateway

10. Administrative Panel

- To ensure seamless content updates and user management, the app will include a robust administrative panel with the following capabilities:

- Add, edit, or delete content for all sections (Calendar, Daily Messages, Winners, Downloads, etc.).

- Manage user profiles and interactions.

- Configure advertisements and popups.

✞ Generate reports and analytics for user engagement.

✞ Shopping Oder history

Technology Stack

1. **Frontend**:

   ✞ HTML, CSS, JavaScript
   ✞ Bootstrap (for responsive design)

2. **Backend**:

   ✞ PHP
   ✞ Node.js (if necessary for API integration)

3. **Database**:

   ✞ MySQL

4. **Additional Tools**:

   ✞ QR Code Generator

   ✞ PHPMailer for email notifications (if required)

Project Timeline

Phase	Duration	Tasks
Requirement Analysis	1 Day	Detailed discussion with the client, finalizing requirements, and user role specifications.
Design	3 Days	Design UI/UX, create wireframes, and get client approval.
Development	1 Week	Build backend and frontend functionalities.
Testing	2 Day	Perform unit, integration, and user acceptance testing.
Deployment	1 Week	Deploy the system and provide training for its use.

Total Project Duration: **2 Weeks & 6 Days**

Pricing

Development	**Rs.15,000.00**
Testing and QA	**Rs. 5000.00**
Hosting Fee	**Rs. 5000.00**
Total Cost	**Rs.25,000.00**

Deliverables

- Fully functional Daily Routine Mobile Application.
- User manuals and training documentation.
- Deployment and post-deployment support for 2 months.
- Free system error maintenance for 1 year.
- Additionally, if you want to add something new later, you can pay for it and add it.

Note

If the client agrees with the project proposal, we will proceed to send a detailed
Agreement Document **outlining the terms and conditions of the project along with the** Payment Process Details**.**

We ensure:

- ✟ **100% Safety and Security**: The system will be developed with robust security measures to protect data and ensure compliance with best practices.
- ✟ **High-Quality Delivery**: We guarantee that the final product will meet all specified requirements and adhere to the highest quality standards.

Please let us know if you have any additional questions or adjustments to this proposal. Once confirmed, we will move forward with the next steps.

THANK YOU ....!
